Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

DETAILED ACTION

Claim Rejections - 35 USC § 112

The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

Claims 1-6 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the enablement requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to enable one skilled in the art to which it pertains, or with which it is most nearly connected, to make and/or use the invention.

The independent claims recite, "an overhanging heel between the resilient body element and the trailing end of the flat surface." As viewed in figures 8A-8B, which illustrate the relationship between the heel, body and the trailing end of the flat surface, the heel overlaps with the resilient member and is not *between* the resilient member and the trailing end.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-6 are rejected under 35 U.S.C. 102(b) as being anticipated by U.S. Patent No. 4,467,793 to Ender. Ender discloses in figure 1 an intrafocal plate comprising the flattened portion 7 as seen in figure 2, a heel comprising the flattened portion on the leading end, a resilient body element 4 (Abstract) defining a pin element, a shoulder formed on the leading cylindrical portion of element 5, and a screw aperture 9.

Claims 1 and 3-5 are rejected under 35 U.S.C. 102(b) as being anticipated by U.S. Patent No. 4,483,335 to Tornier. Tornier discloses in figure 1 an intrafocal plate comprising an elongated plate 8b having a flat surface, a resilient body 8 (column 2, lines 9-13), an overhanging heel 8a, a pin element on the other end of the body element, and a screw 9.
